- Following
- Hashtags
- Twidère

URL

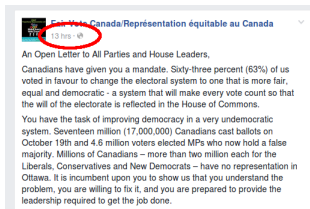

- Right click timestamp to get link to this post

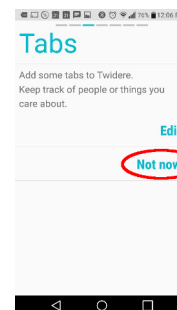

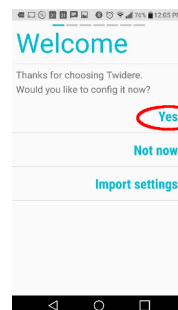

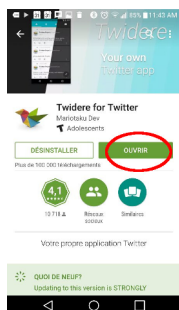

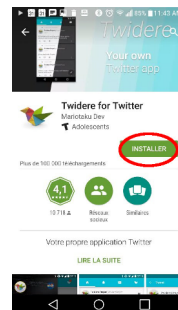

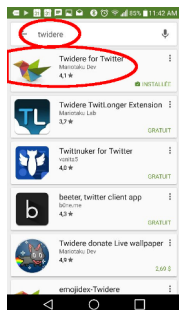

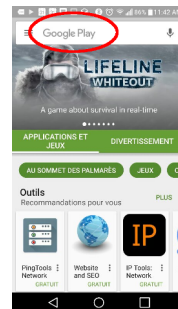

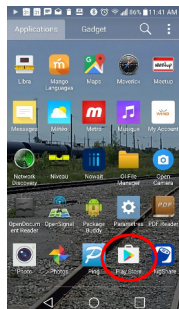

- Right clicking on the timestamp and select « copy link » to get link to this post

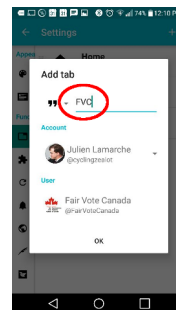

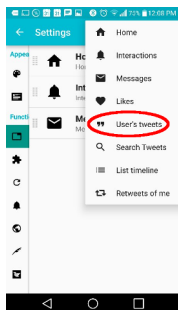

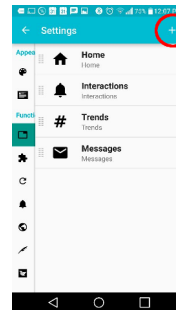

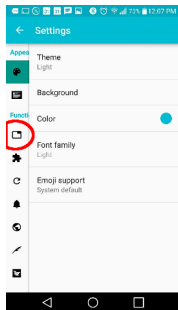

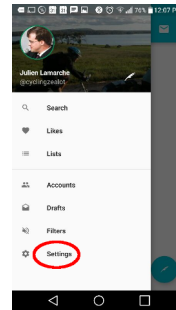

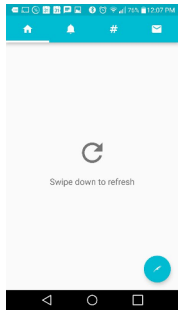

Scope

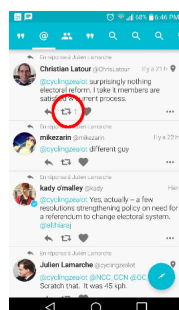

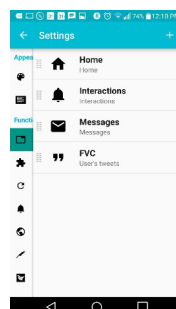

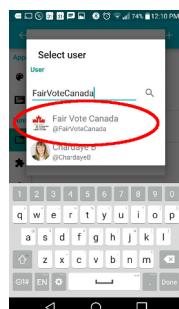

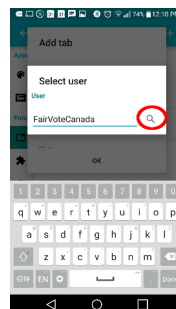

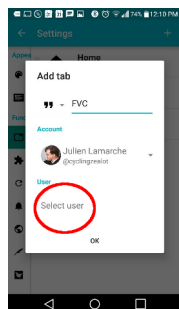

- If icon next to timestamp is a planet, then visible to everyone, even people without Facebook

Twitter : Following vs hashtags

PR rebuttals

| | |
|----------------------------------|--|
| « PR is for losers » | Governance isn't a sport. We are taxpayers too & deserve #voterquality |
| | We are not asking for governance, we're just asking for representation |
| | Actually, between elections, in PR, you get multiple MPs. So PR is for people not afraid of competition. |
| « Your local MP represents you » | Yes and under a PR system, I can have multiple MPs with at least one who I voted for |
| Unaccountable | In all proportional systems being proposed, all candidates face voters |
| Loose local representation | All PR systems being proposed keep an element of local or near-local representation |
