Why proportional representation?

It's the critical
issue....

.... to the urgent ones
we care about.

Fair Voting

- 1) Why FPTP doesn't serve voters
- 2) History of the mouvement
- 3) Voting system concepts
- 4) Different voting systems
- 5) Where to go from here?

FPTP doesn't serve voters

- Phony majorities
 - Ontario (since 1937)
 - Canada (since 1984)
 - Quebec (since 1985)
- How can institutions be accountable?

Voting systems

- The ballot
- Seats per electoral districts
- The algorithm
(votes \rightarrow seats)

Single member plurality (First past the post)

The ballot:

One X per vote

Seats per electoral district:

308 ridings of one seat

The algorithm:

The seat is given to the candidate with at least 1 more vote than everyone else.

What is an electoral district?

- A bounded geographical area who's voters are represented by one ***or more*** legislators
- **Canada** : 308 electoral districts represented by 308 MPs
- **Australian senate** : 6 staes, each represented by 12 elected senators
- **Norway legislature** : 19 counties, each represented by 4 to 17 legislators

History of voting reform in the world

- 1924-1957 : Alberta uses STV (Edmonton & Calgary) & AV (rest of province) to elect MLAs

Single Transferable Vote

The ballot:

- A ranked ballot for candidates of different parties, one to many candidates per party

Seats per electoral district:

- 2-7 in BC-STV

The algorithm:

- 1) Quota determined first
- 2) Count the one
- 3) Transfer votes of surplus or losing candidate
- 4) Repeat until all seats are filled

Alternative Vote (**not** proportional)

- Also called Instant Runoff Voting or preferential voting
- Like STV, has a ranked ballot
- Only one seat per district
- Threshold is set to 50%

Vote alternatif

L'algorithme

Alternative Vote Preferential Voting

The ballot:

- A ranked ballot for candidates of different parties, one per party

Seats per electoral district:

- One seat per district

The algorithm:

- 1) Quota determined first
- 2) Count the number one
- 3) Transfer votes of losing candidate
- 4) Repeat until one candidate has $>50\%$
